Hey Shooter,

Can you believe it?!? September is already here and summer is almost over.

Back to school is in the minds of most of us. Back to school also reminds us of all the classes offered at RenArms. Check out our website for all the current offerings.

Did you also know that we offer "Private Sessions" on-demand. You can just stop in and get 1/2 hour or 1 hour sessions on the spot no waiting needed. Our folks can help you with all the basics like grip, stance, and sight alignment. You can also get evaluated for what class might help you best in the future. You can also continue to have private sessions at your pace. Wicked cool stuff going on with RenArms Education.

Also with the end of summer comes the beginning of hunting season. Keep a close eye on our Facebook page and our website for details regarding hunting specials and sales. We want to help make your next hunting experience as enjoyable as possible. Fall also brings shotgun season for clays and birds. I am always available to give some pointers to raise your score on the sporting fields or help fill your bag limits in the field. Reach out via buddy@renarms.com for more shotgun shooting info and help.

As always,

Be safe and be well,

Buddy.

Here are the dates!

Starts September 1	Black bear/dates vary for method and WMU
September - January	Waterfowl/dates vary by species and zone
September 15 - December 15	Deer/archery (Note: archery season closes one week early in WMU A)
September 15 - December 15, 2023	Fall turkey/archery WMUs B-M (Note: archery season closes one week early in WMU A)
October 16 - October 22, 2023 in ONLY the following WMUs: D2, G, H1, H2, I1, I2, J2, K, L, M	Fall turkey/shotgun (in certain WMUs only)
September - March	Small game and furbearers/dates vary by species and region

Training

On September 23rd for just \$24.99 per person, we will be offering a Scope Zeroing Class starting at 10am.

What we will be covering,

- Basics of scope mounting, reticules, and the thought behind zeroing distances.
- We will explain the process of zeroing.
- Lastly we will go to the range and do it step by step in front of you.

Zeroing is a critical skill to have as a hunter for clean and ethical harvests, and just as important to giving you confidence in hitting your target at any range.

Hope to see you all there!

Bill B.

Cerakote

Hunting season is on the radar,

You still plenty of time to add that camo pattern or single color using cerakote.

Cerakote has many benefits and is one of the most popular coatings for firearms. It's not just for looks, It's got a lot to do with rust protection, durability, and overall helps against corrosion.

You might ask "Well what is cerakote?".

"Cerakote is a Polymer-Ceramic Composite coating that can be applied to metals, plastics, polymers and wood. The unique formulation used for Cerakote ceramic coating enhances a number of physical performance properties including abrasion/wear resistance, corrosion resistance, chemical resistance, impact strength, and hardness"

Cerakote is known to be one of the toughest coating in the industry. It's unmatched when it comes to popularity and a lot of people might not even know their firearm is cerakoted from a good portion of factories. Companies like Noveske, & Aero Precision both use cerakote on their rifles.

Let's get that hunting tool protected an blended into your surroundings!

Be sure to like and follow us on Instagram at Renarmscerakote for all the latest deals and projects.
